CannaSun™

Introducing CannaSun™ – A New Standard in Seed-Produced Cannas

We're proud to unveil the all-new CannaSun™ Series; an exciting Canna line offering a vibrant spectrum of colors on lush dark green or bronze foliage. Bred for naturally compact growth, each plant develops 8–12 flower stems throughout the growing season. With each stem producing two flower clusters, you can count on continuous color all summer long.

Whether showcased in mixed containers, standing tall in decorative pots, or planted directly in garden beds, CannaSun delivers bold color and tropical charm to any summer display. Its controlled growth habit and sunny, striking appearance make it a true showstopper in any setting.

8-12 flower stems per season
